V1 example run

One small story, scene by scene. Each scene shows what happened, which engine runs, and how the notes look afterward.

Active note · Challenged · Closed · You decide

SCENE 1: The first notes

The team chats after testing the app.
“Blue buttons failed the contrast test.”
“We decided: dark green buttons.”
Both are worth keeping.

1 **CAPTURE**
AI proposes 2 notes. A script checks. You confirm.

2 **RELATE**
The AI suggests a pair. Only one kind fits, so the script sets it. You accept.

FINDING · ACTIVE
Blue buttons failed the contrast test
depends_on
NEW
DECISION · ACTIVE
Use dark green buttons

SCENE 2: An open question

Someone asks: “Does dark green pass the test?”
Nobody knows yet.

1 **CAPTURE**
Saves it as a Question.

FINDING · ACTIVE
Blue buttons failed the contrast test
depends_on
DECISION · ACTIVE
Use dark green buttons

NEW
QUESTION · ACTIVE
Does dark green pass the test?

Faded = saved in an earlier scene and not touched in this scene.

SCENE 3: The answer arrives

A new test says dark green passes. It could support or contradict the Decision, so the script asks you to choose.

1 **CAPTURE**
Saves the new Finding.

2 **RELATE**
Question link: automatic. Decision link: you choose supports.

3 **MAINTAIN**
The answers link closes the Question.

FINDING · ACTIVE
Dark green passes the new test

Faded = saved in an earlier scene and not touched in this scene.

SCENE 4: A surprise

Later the team finds the first test was set up wrong. The blue result cannot be trusted.

1 **You close a note**
You close the first Finding as invalid.

2 **MAINTAIN**
The Decision rested on it, so it is marked Challenged.

FINDING · ACTIVE
Dark green passes the new test

Faded = saved in an earlier scene and not touched in this scene.

SCENE 5: Reading it back

Someone asks: “Why did we pick green?”

1 **QUERY**
Shows the Decision, flagged Challenged, and the notes it rests on.

2 **You recheck**
The new Finding still backs it up, so you set it back to Active.
